

Pinal County Transient Database
CAAG Planning/Research Department
February 2009

CAAG created the transient database based on data gathered from internet resources and CAAG's employer database. The transient database is an inventory of rooms and employees for hotels, motels, resorts and bed and breakfast facilities in Pinal County. The database is updated annually and is presently current as of July 2009. The database is maintained using Arc GIS and excel spreadsheets. All data is collected and reviewed by each CAAG member agency. These files are available upon request through the CAAG license agreement.

This database does not represent a legal survey and is intended for general planning purposes only.
